

Top Five LinkedIn Professional Growth Tools

LinkedIn plays a very important role in the professional development of its users. It is an amazing tool which provides a dynamic ecosystem to grow yourself professionally. The platform is used for various purposes such as searching for a job, hiring potential employees or getting help.

More than 1 billion people from 200 countries use LinkedIn. Hence, it provides a huge customer base to fulfill your professional needs. To attract your target audience, you need to know about the latest **LinkedIn innovations** so that you can achieve your desired results.

Being a professional network, [LinkedIn](#) offers several tools & features to support career growth & development. If you are new to LinkedIn, these **LinkedIn career advancement features** may

seem overwhelming. So, to help you out, this blog will focus on **LinkedIn professional growth tools** in detail & pave your way towards the path of professional growth.

Tools for Growing Professionally:

LinkedIn Learning

It is an online learning platform that provides video courses. The subjects range from Interpersonal communication to Excel Training. One can select different plans for individuals, teams & organizations according to what suits their needs.

These courses are taught by industry experts & thought leaders who have real-world experience. Professionals can learn from these courses at their own pace by fitting learning into their busy schedules.

[LinkedIn Learning](#) provides personalized recommendations so that professionals can discover relevant content aligned to their career goals. Also, upon successful completion of their courses, learners can earn verified certificates to showcase their skills & knowledge.

LinkedIn Live

LinkedIn Live offers a dynamic platform for professionals to share knowledge, connect with their audience & position themselves as leaders in their industry.

A vast network of professionals come together to showcase their talents & connect with a wide range of individuals which facilitates networking opportunities, lead generation & career advancement. Professionals can connect with their audience in real time, which helps to cater for the content as per the preferences & interests of their audience.

LinkedIn events

It is a feature that enables users to create, promote & attend professional events directly on the LinkedIn platform. It also provides networking opportunities to individuals in their professional network.

Creating compelling events with relevant content helps professionals to raise awareness about their brand & expertise. Events help attendees to grow themselves professionally.

Another tool [LinkedIn](#) provides for its event is analytics which offers insights to help organizers assess the effectiveness of their events & refine their event strategies.

Open to work

This feature is one of the **new LinkedIn tools for professionals**. It allows the recruiters to know if you are currently looking for a role or a job. Using this feature, users can indicate their job-seeking status & preferences on their profiles.

When this feature is enabled, a green frame becomes visible around the profile picture which signals recruiters & employers that the person is available to work. It increases the user's visibility to recruiters & leads to more job opportunities. A great feature of this tool is that it provides users with supportive resources & tips such as articles, webinars & guides which help the users to navigate easily through their goals.

LinkedIn sales navigator

LinkedIn Sales Navigator empowers sales professionals with the tools & insights they need to identify & engage with potential customers effectively, ultimately helping them drive revenue & grow their businesses.

It offers various features like advanced search features based on industry, company size, job title, location, & more, lead recommendations to match the preferences of the users & team collaboration. One can easily send direct messages through InMail to prospects not connected on [LinkedIn](#).
